Nippon Steel Trading Launches Dedicated Website for the “SKYGAUGE” Non-Destructive Inspection Drone

Nippon Steel Trading Corporation (hereinafter referred to as “our company”) has launched a dedicated website introducing the “SKYGAUGE” non-destructive inspection drone developed by Canada-based Skygauge Robotics Inc. (hereinafter referred to as “Skygauge”), for which our company holds the exclusive distribution rights in Japan.

“SKYGAUGE” Website:：https://nst-skygauge.com/

The website provides an easy-to-understand overview of “SKYGAUGE,” including its features as a contact-based inspection drone capable of ultrasonic thickness measurement, available payloads, application scenarios, key specifications, and the implementation process.
“SKYGAUGE” is an inspection solution that enables ultrasonic thickness measurement by allowing the drone to make direct contact with inspection targets without the use of ropes, scaffolding, or aerial work platforms. By precisely controlling the aircraft’s orientation and thrust, the drone can maintain stable contact with a wide variety of surfaces, including walls, slopes, ceilings, and curved surfaces, thereby contributing to improved safety, labor savings, and greater efficiency in inspections conducted at elevated locations.
Our company will continue to provide clear and accessible information about “SKYGAUGE” through this website and promote the wider adoption and expansion of non-destructive inspection solutions in the Japanese market.
